WORK EXPERIENCE

Alethe Consulting — Gurugram, India ***May 2026 – Present***

Full Stack Developer (.NET Core, SQL Server / PostgreSQL, JavaScript | SaaS Platform)

- **Spearheaded** the end-to-end development of a metadata-driven Dynamic Form Builder for MASS, automating SQL schema generation and reducing form onboarding time by 70%.
- **Architected** a multi-provider external database integration layer supporting 4 database engines (SQL Server, PostgreSQL, MySQL, Oracle) with live schema introspection and dynamic foreign-key resolution.
- **Engineered** 50+ high-throughput RESTful APIs, comprehensive audit trails, and multi-tier senior-subordinate approval hierarchies using ASP.NET Core and EF Core under Clean Architecture.
- **Integrated** automated GPS tracking workflows with Haversine distance calculations and asynchronous email/push notification pipelines via RabbitMQ background dispatch.

CGM ARIA Health Services — Noida, India ***Dec 2024 – Apr 2026***

Software Engineer I (.NET Core, SQL Server, JavaScript | SaaS Platform)

- **Developed** core features and backend microservices on the ARIA platform, delivering healthcare billing and claims solutions to 200+ healthcare providers and clinics across Europe and North America.
- **Optimized** data accessibility and database queries for claims processing, reducing data retrieval time by 30% and boosting system efficiency.
- **Integrated** an AI-powered document validation service to pre-screen medical records and PDF claims for quality anomalies (blur, skew), cutting manual verification effort by 40%.
- **Collaborated** across cross-functional Agile teams to resolve complex production defects, resulting in enhanced platform stability and faster claims turnaround.

Optimiser India — Noida, India ***Mar 2022 – Nov 2024***

Associate Software Engineer (ASP.NET Core, Angular, SQL Server, MongoDB | SaaS Platform)

- **Delivered** full-stack features across 3 enterprise hospitality SaaS platforms (Booking Clap, Blue Orchid Hotels, and G-H-S Hotels) for hotel reservations, inventory, and guest management.
- **Constructed** comprehensive Partner Portal and CMS modules managing real-time inventory, rates, negotiable rates, and dynamic cancellation policies across 100+ REST APIs.
- **Automated** daily database backup routines and storage cleanup by developing a custom .NET Windows Service with automated daily email status reports, achieving 99.9% reliability.
- **Refactored** legacy backend code and resolved 100+ production defects, achieving a 90% reduction in system bugs.

PROJECTS

Cloud-Native E-Commerce Microservices Platform

ASP.NET Core, Microservices, EF Core, Dapper, Docker, Kubernetes (AKS), Redis, RabbitMQ, Azure DevOps, PostgreSQL, MongoDB

- **Built** decoupled Users, Products, and Orders microservices using EF Core and Dapper with polyglot database persistence across PostgreSQL, MySQL, and MongoDB.

- **Containerized** services with Docker and orchestrated deployment via Kubernetes (AKS); implemented asynchronous messaging with RabbitMQ and distributed caching with Redis.
- **Configured** continuous integration and continuous deployment (CI/CD) pipelines using Azure DevOps for automated zero-downtime releases.
